

Windows 10

תאור הקורס

Windows 10 is the latest version of the Windows operating system released by Microsoft on June 29, 2015. It follows Windows 8 and Windows 8.1, which introduced some of the biggest changes to the operating system since the first release in 1985. Windows 10 seems to blend what users loved about Windows 7 with the best features of Windows 8.1 to create a modern operating system that is productive and efficient.

The purpose of this course is to teach all students how to navigate the Windows 10 interface, as well as use its features and apps, regardless of whether you are currently using the operating system .
