

# PowerShell Scripting

Windows PowerShell is a Microsoft framework for automating tasks using a command-line shell and an associated scripting language. This powerful tool essentially replaced Command Prompt as the default way to automate batch processes and create customized system management tools. Working with these scripts effectively can be a difficult task, PowerShell scripting framework contains script logging methodologies, answer file interactions, and string encryption and decryption strategies. This comprehensive course starts from scratch and covers advanced-level topics to make you a PowerShell expert.
